

Koneru Rajesh

Hyderabad, Telangana, India

rajeshkoneru29@gmail.com | 9390193971 | LinkedIn | GitHub

Professional Summary

B.Tech (ECE) student graduating in 2027 with hands-on experience in backend and full-stack development using Python, Java, SQL, React, Flask, Django, and Spring Boot. Experienced in building RESTful APIs, database-driven applications, and scalable backend systems through academic and internship projects. Strong foundation in software engineering, object-oriented programming, and problem-solving.

Technical Skills

Programming Languages: Python, Java, SQL, JavaScript

Backend Development: Spring Boot, Flask, Django, FastAPI, REST APIs

Frontend: React.js, HTML5, CSS3

Databases: MySQL, MongoDB

Tools & Technologies: Git, Docker, Postman, AWS Basics

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Authentication, CRUD Operations, API Development, Backend Architecture

Experience

Backend Developer Intern

Jun 2025 – Apr 2026

JALA Academy, Hyderabad

- Developed and maintained RESTful APIs using Flask and Node.js for backend workflows.
- Assisted in designing scalable backend modules and API integrations for full-stack applications.
- Mentored students in React, backend development, and API integration concepts.
- Performed API testing, debugging, and validation using Postman.
- Collaborated using Git workflows and participated in code reviews.

Projects

MovieMasti - Movie Ticket Booking System

Spring Boot, React.js, MySQL, Docker

Apr 2026

- Developed a full-stack movie ticket booking application using Spring Boot for backend services and React.js for the user interface.
- Designed and implemented RESTful APIs for movie management, show scheduling, seat booking, and user operations.
- Integrated MySQL database for storing user, booking, movie, and transaction data with optimized query handling.
- Containerized the application using Docker to simplify deployment and ensure a consistent development environment.

Github Repository

AuditAvenger – Financial Audit Management System

Flask, MongoDB

Nov 2024 – Feb 2025

- Developed backend services and REST APIs using Flask.
- Implemented role-based authentication and secure access management.
- Designed MongoDB schemas for audit logs and financial records.
- Containerized and deployed the application using Docker.

GitHub Repository

Customer Loan Management System

Django, SQL

Aug 2025 – Dec 2025

- Built a Django-based loan management application with backend database integration.
- Designed relational database schemas and optimized SQL queries.
- Implemented customer tracking and financial data management features.
- Used Git for version control and application maintenance.

GitHub Repository

Education

Bachelor of Technology (Electronics & Communication Engineering)

Expected 2027

Siddhartha Institute of Engineering & Technology (SIET)

CGPA: 8.3

Certifications

- Full Stack Developer — Cognify
- Software Development Certification — Zidio Development
- Full Stack Development Training — JALA Academy

Achievements

- Mentored 20+ students in backend and full-stack development concepts.
- Built multiple backend and database-driven applications using Java, Python, and SQL.
- Solved 80+ coding problems on LeetCode.
